

# BIOMES, ECOSYSTEMS AND HABITATS

WHAT IS THE DIFFERENCE?

<h2>MISSION: BIOMES</h2>  <p>Photo credit: NASA</p>	<p>A <b>biome</b> refers to a region of the world characterized by its resident life, environment and climate.</p>
 <p>Photo credit: easyscienceforkids.com</p>	<p>The word <b>ecosystem</b> refers to the interaction between organisms living together in a particular environment. Ecosystems are also defined by the flow of energy and nutrients throughout the system.</p>
 <p>Photo credit: Pixabay</p>	<p>A <b>habitat</b> is specific to species or population of organisms. Wherever that population lives is its habitat.</p>
